Count and remember the number of doors between the exits and your door. Open exit doors and examine the staircase layout. Locate the Manual Call Point and fire extinguisher. Inspect your room. Study the layout of your room and determine anything that might help or hinder possible emergency exiting. Read all fire emergency information provided, including the layout on the back of the door. In Case of Evacuation

In order to ensure your safety and wellbeing, an evacuation call may be given by the Management through the public address system. Listen carefully to the transmitted message and follow the instructions:

- Feel the edges of the room door. If it is not hot, then open the door to leave the room. Take your room key card and close the door
- Hug walls while exiting. While moving to the nearest exit, keep close to the walls, stay low, air is fresher at the floor level.
- Do not use elevators, in case of fire.
- Walk to the nearest stairway, exit the building to a 'Safe Assembly Area'

The aim of these instructions is to acquaint you with the actions to be implemented when evacuation is ordered.

Indication for Evacuation

The indication for evacuation of the Hotel will be in the following manner:

- A. Sirens will be sounded.
- B. Announcement on PA system will be made to all guests.

Evacuation Routes

For evacuation routes, please refer to "Exit Route Plan" fixed on the back of your room's main door.

Caution

As soon as the sirens are heard or message received regarding evacuation, the relevant departments responsible for evacuation will swing into action and evacuate guests/personnel in two lines along the staircases. There must be no pushing, stampeding, shouting or blocking of entrances or exits.

Special care will be taken of aged, disabled and children. The Floor Marshalls will report the completion of evacuation of guests from the floors, after checking toilets, to the Evacuation Controller. They will be the last to leave the floors.

It is most essential for you to understand that in case of fire, the floor above will be evacuated first and then the floors down below.
